Summary

A recent MIS graduate from San José State University with hands-on experience in data analysis, dashboard creation, and business process improvement. Skilled in Tableau, SQL, and Excel, with a background in team-based projects involving data cleaning, visualization, and systems analysis. Eager to learn, detail-oriented, and motivated to contribute in an entry-level Data Analyst or Business Analyst role.

Education

California State University, East Bay — Hayward, CA
Master of Science in Business Analytics — *Aug 2026 – Present*

San José State University — San José, CA
Bachelor of Science in Business Administration, Management Information Systems — *Aug 2023 – May 2025*

- **Relevant Coursework:** Database Management Systems, Systems Analysis & Design, Business Strategic Information Systems, Quantitative Business Analysis

Projects

Campus Classroom Analytics Dashboard | *Tableau, Python, Data Cleaning* — Fall 2024

- Built a Tableau and Python dashboard with a six-person team to forecast SJSU building and garage traffic from class scheduling data.
- Cleaned a 500,000-row class scheduling dataset, then built a pie chart mapping campus buildings to their nearest parking garage by enrollment.
- Delivered a heat map, bar chart, and trend line that SJSU IT and Parking Services formally accepted for live data integration.
- *View Interactive Dashboard*

Systems Analysis and Design Project | *Systems Documentation, SDLC, Data Modeling* — Fall 2024

- Collaborated in a team-based MIS project to develop a proposed information system solution addressing business process inefficiencies.
- Conducted requirements analysis through interviews, data collection, and workflow mapping to define system goals and user needs.
- Designed detailed data flow diagrams (DFDs), use case diagrams, and entity-relationship models (ERDs) to document system architecture.
- Delivered feasibility studies, technical specifications, and SDLC-aligned design documentation to faculty and peers.

SMB Digital Transformation Case Study | *Systems Analysis, Process Improvement* — Spring 2025

- Analyzed five business functions (Sales, Finance, Warehouse, IT, HR) to identify process inefficiencies and recommend technology solutions supporting a $33M–$72M revenue growth plan.
- Developed requirement specifications for CRM and inventory management systems, including use case documentation and digital transformation classifications.
- Produced current-state assessments and solution recommendations aligned to strategic business objectives.

Water Quality Report Automation App | *Streamlit, OCR, Python, Data Processing* — Spring 2025

- Developed a Streamlit-based tool that automates extraction and summarization of monthly San Jose Water quality reports using OCR and GPT-assisted text processing.
- Designed a workflow for parsing PDF data, identifying key measurements, and generating advisory insights without requiring manual data entry.
- Implemented a simple user interface enabling report upload, automated processing, and display of chemical results and compliance indicators.
- Used GPT-3 to convert technical results into concise, plain-language summaries and advisory notes for everyday users, reviewing outputs for clarity and accuracy.

Certifications

Google Data Analytics Professional Certificate
Issued by Google via Coursera — *Nov 2025*

Technical Skills

Tools & Software: Tableau, Python, Excel, Google Sheets, SQL, OpenAI, LLM
Technical Skills: Data Cleaning, Dashboard Creation, Process Analysis, Systems Design, Visualization Design
Soft Skills: Collaboration, Adaptability, Problem Solving, Communication
